Beskrivning

Technical data

D [mm] 10

Note RoHs-compliant

Weight 65 g / pc.

Further information

Customs duty number: 84812090

Description

Operating pressure:

0 - 10 bar

Temperature range:

0°C to max. +60°C

Functional principle:

Stryp/backventiler push-in, IQS standard: IQSDRV 100

Flow control silencers choke the flow in one direction, while the flow remains unrestricted in the other direction. The standard construction of the flow control silencers is “exhaust air flow controlling”. If they are screwed into a cylinder, for example, then they provide for an even flow without causing a slip-stick effect. In the case of cylinders with small volumes (a small diameter/low stroke rate), flow control silencers are utilised with the special “supply air flow controlling” construction.

*Mini design

All data are to be understood as non-binding reference values! We do not assume liability for any data selection not confirmed in writing. Unless otherwise specified, pressure values refer to liquids from Group II at +20°C.
