Kopparrör rulle mjukt installationsrör (R220): CUR 18X1 R**

*Industrial quality EN 12449, **only complete rolls are available, ***the maximum permitted operating pressure was calculated based on soft copper tubes (R 200) and a safety value of 3,5 at an operating temperature of 100°C. The permitted operating pressure is based on the copper tube, not on the connecting parts! The values for harder tubes are higher.

All data are to be understood as non-binding reference values! We do not assume liability for any data selection not confirmed in writing. Unless otherwise specified, pressure values refer to liquids from Group II at +20°C.
